

Creación de perfil de red inalámbrica

Android 7

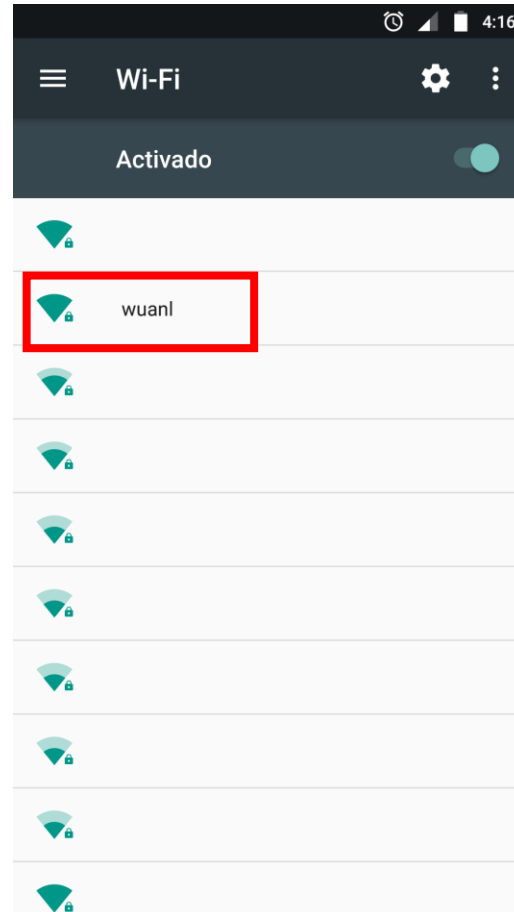

1. Ir a “Configuración”

2. Entrar a “Wi-Fi”

3. Pulsar sobre el perfil “wuanl”

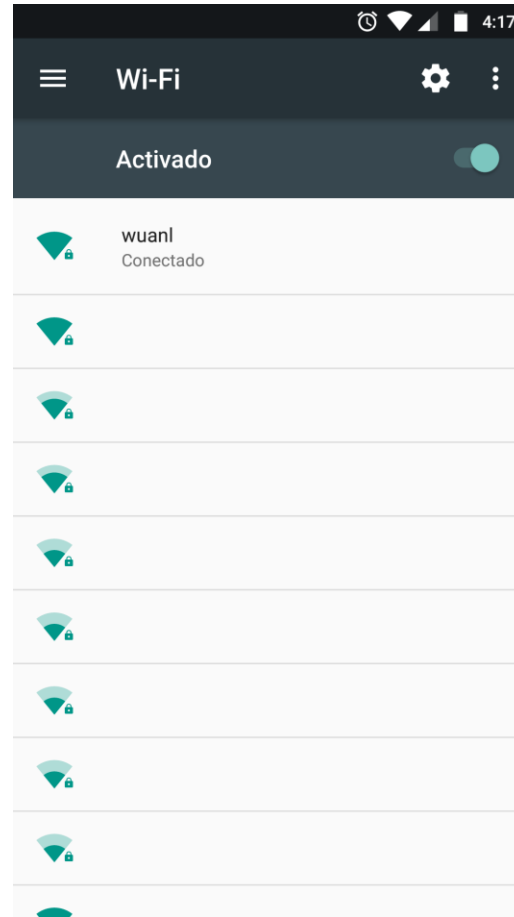

4. Configurar el perfil y presionar en “Conectar”

- Método EAP: **PEAP**
- Autenticación de fase 2: **MSCHAPV2**
- Certificado de CA: **No Validar**

- Identidad: **Matrícula**
- Identidad anónima: **Dejar en blanco**
- Contraseña: **Contraseña**

The screenshot shows a mobile interface for configuring a network profile. At the top, the profile name is 'wuanl'. Below it, there are several dropdown menus and text input fields, all of which are highlighted with red boxes. The first dropdown is 'Método EAP' with 'PEAP' selected. The second is 'Autenticación de fase 2' with 'MSCHAPV2' selected. The third is 'Certificado de CA' with 'No validar' selected. Below these is a warning message: 'No especificaste ningún certificado. Tu conexión no será privada.' The 'Identidad' field contains '1437153'. The 'Identidad anónima' field is empty. The 'Contraseña' field is filled with dots. At the bottom, there are two buttons: 'CANCELAR' and 'CONECTAR', with 'CONECTAR' highlighted by a red box. The status bar at the top shows the time as 4:17 and various icons. The bottom of the screen shows the text 'w3mac'.

5. Si la red dice “Conectado”, está listo para navegar

- Con estos pasos el perfil de red inalámbrica ya ha sido creado.
